What is claimed is:

- 1 [cl1] 1. A method for treating anxiety in a patient in need of said treatment
- 2 comprising orally administering to said patient as an active ingredient, an anti-anxiety
- 3 compound of the formula

or a pharmaceutically acceptable salt thereof,

- at a daily dosage of from about 50 to 250 mg, with said daily oral dose having a first
- portion of the active ingredient in an rapid release form and the remaining portion of
- said active ingredient in a sustained release form, said proportion of said active
- ingredient in the rapid release form administered being from about 1 to about 4 times
- the weight of the portion administered in sustained release form.
- 1 [cl2] 2. The method of claim 1, wherein the daily dose is administered in from 1 to
- 2 3 administrations per day.
- 1 [cl3] 3. The method of claim 1, wherein said active ingredient is administered as
- 2 tablets.
- 1 [cl4] 4. The method of claim 2, wherein each of said separate administrations, the
- 2 sustained release portion is administered in combination with the rapid release portion.

- 1 [cl5] 5. The method of claim 4, wherein the daily dose of said anti-anxiety
- 2 compound is from about 120 to 240 mg.
- 1 [cl6] 6. The method of claim 5, wherein in each of said administrations the
- 2 proportion of said active ingredient in the rapid release portion form is about 2.5 to 3.5
- 3 times the weight of the portion in the slow release portion.
- 1 [cl7] 7. The method of claim 3, wherein in each of said administrations the slow
- 2 release portion is administered together with the rapid release portions.
- 1 [cl8] 8. The method of claim 7, wherein in each of said administrations, the slow
- 2 release portion and the rapid release portion are administered in a single tablet.
- 1 [cl9] 9. The method of claim 8, wherein said tablet contains the active ingredient
- 2 rapid release form in an amount of about 3 times the weight of the active ingredient
- 3 slow release form.

4

- 1 [cl10] 10. The method of claim 9, wherein the tablets administered contain about 10
- 2 mg of the active ingredient in its sustained release form and about 30 mg of the active
- 3 ingredient in its rapid release form.
- 1 [cl11] 11. The method of claim 9 wherein the tablets administered contain about 30
- 2 mg of the active ingredient in its sustained release form and about 90 mg of the active
- 3 ingredient in its rapid release form.
- 1 [cl12] 12. A pharmaceutical oral unit dosage form comprising two separate
- 2 compartments each containing a composition comprised a pharmaceutically active
- 3 ingredient selected from the group consisting of the compound of the formula

5 6

and a pharmaceutically acceptable salt thereof

Ι

- 7 in a mixture with a pharmaceutically acceptable carrier, said active ingredient being
- 8 present in the unit dosage form in an amount of from about 50 to about 250 mg, with
- 9 the amount of said ingredient in the first compartment being from about 1 to about 4
- times the weight of said active ingredient in the second compartment, the composition
- in the first compartment being adapted for rapid release of said active ingredient
- contained therein and the composition in the second compartment having incorporated
- therein a hydrophilic polymeric matrix which causes sustained release of the active
- ingredient in the second compartment.
- 1 [cl13] 13. The unit dosage form of claim 12, wherein the oral dosage form is a tablet.
- 1 [cl14] 14. The unit dosage form of claim 13, wherein the composition has a particle
- 2 size diameter less than 250 microns.
- 1 [cl15] 15. The unit dosage form of claim 14, wherein the polymeric matrix is
- 2 hydroxypropyl methyl cellulose.
- 1 [cl16] 16. The unit dosage form of claim 15, wherein the pharmaceutically acceptable
- 2 carrier in each of said compartments is fast flow lactose.
- 1 [cl17] 17. The unit dosage form of claim 14, wherein the active ingredient is present
- 2 in the unit dosage form in an amount of from about 80 to about 240 mg.
- 1 [cl18] 18. The unit dosage form of claim 17, wherein the active ingredient is present
- 2 in the unit dosage form in an amount of from about 120 to about 240 mg.

- 1 [cl19] 19. The unit dosage form of claim 18, wherein the active ingredient is in the
- 2 rapid release portion is in an amount of about 2.5 to 3.5 times the weight of the active
- 3 ingredient in the sustained release portion.
- 1 [cl20] 20. The unit dosage form of claim 19, wherein the tablet contains about 30 mg
- of the active ingredient in the sustained release form and about 90 mg of the active
- 3 ingredient in the rapid release form.
- 1 [cl21] 21. The unit dosage form of claim 20 wherein the tablet contains from about
- 2 10 mg of the active ingredient in sustained release form and about 30 mg of the active
- 3 ingredient in rapid release form.
